

## “Cultivation and Variety Planning” component

### Data sheet

#### Description

A good cultivation planning is half the battle. Get a quick overview. The component „Cultivation and Variety planning“ enables you to have direct access to all your plots of land including crops and varieties. Changes can be carried out quickly and easily and you can see immediately how the crop ratio changes and total quantities harvested vary. This way, quotas and crops under contract can be controlled and adapted quickly. Target-oriented planning enables an efficient cultivation of crops. This goes hand in hand with a considerable time saving. A well-structured plan also helps you to comply with increasing regulations.

The Cultivation and Variety Planning component offers:

- Keep an eye on crop rotation
- Plan the cultivation of crops quickly and easily for several harvest years
- Integrated Greening Check
- Simple planning of varieties with a predefined catalogue of varieties from the Federal Office of Plant Varieties
- The automatic calculation of the demand for seed allows an exact planning of quantities of seed.

#### Price

- The minimum price for the component is 1.80 EUR/month excl. VAT. This allows you to use the component for 50 hectares
- Pricing depending on hectare size of the farm, i.e. the price for 100 ha amounts to 3.00 EUR/month excl. VAT
- The settlement takes place on a monthly basis; together with other components possibly selected by you, if appropriate pro rata temporis invoicing for the component in the first month of use

### Test conditions

- 10-day access free of charge
- The test phase ends automatically, without further obligations
- Unlimited functionality during the test period

### Contract terms

- Minimum term 1 month
- Once the minimum term has expired, the contract is automatically renewed for a period of one month at a time
- Once the minimum term has expired, the contract can be terminated at any time with effect from the end of the current accounting month
- Termination is carried out online at the 356FarmNet Shop by discontinuing the component
- Invoicing occurs together with other booked components in the first month of use, if applicable with pro rata invoicing for the component
- Invoicing occurs based on the farm size at the end of the month being invoiced. Changes to the farm size affect the monthly price of the component.
